

Introducing MTL's New Controlled-Ambient Warehouse

McLanachan Transport (MTL) has established itself as a trusted partner in temperature-controlled logistics across the UK and Europe for over four decades. We provide a complete, customer-centric supply chain solution that ensures your consignments are secure and managed with integrity. Our industry-leading team recognises that every client's needs are unique, and we develop value-added service solutions that enable us to be an integrated partner to your operations.

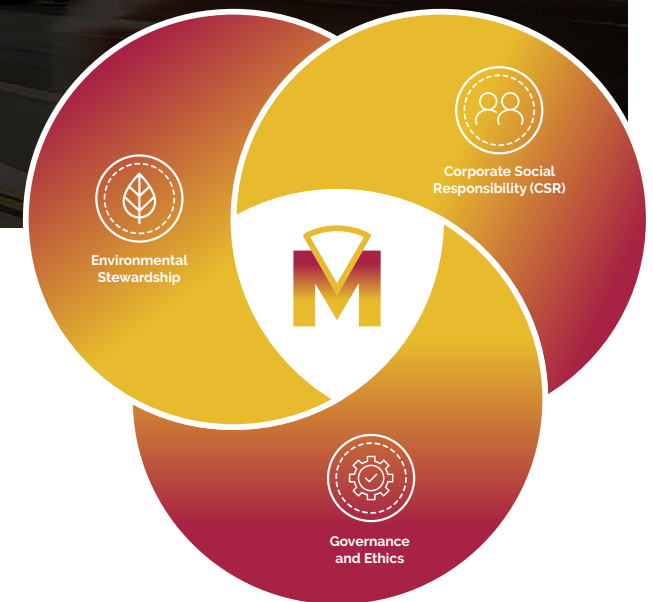

# Exploring our Controlled-Ambient Warehouse Management

Continually, we provide our clients with turnkey management for their supply chain operations and consignments, including warehousing. From the McLanachan Transport facility in Eurocentral, Scotland, our 1000 pallet capacity controlled-ambient warehouse is another reason to choose MTL. As our office team and driver personnel are

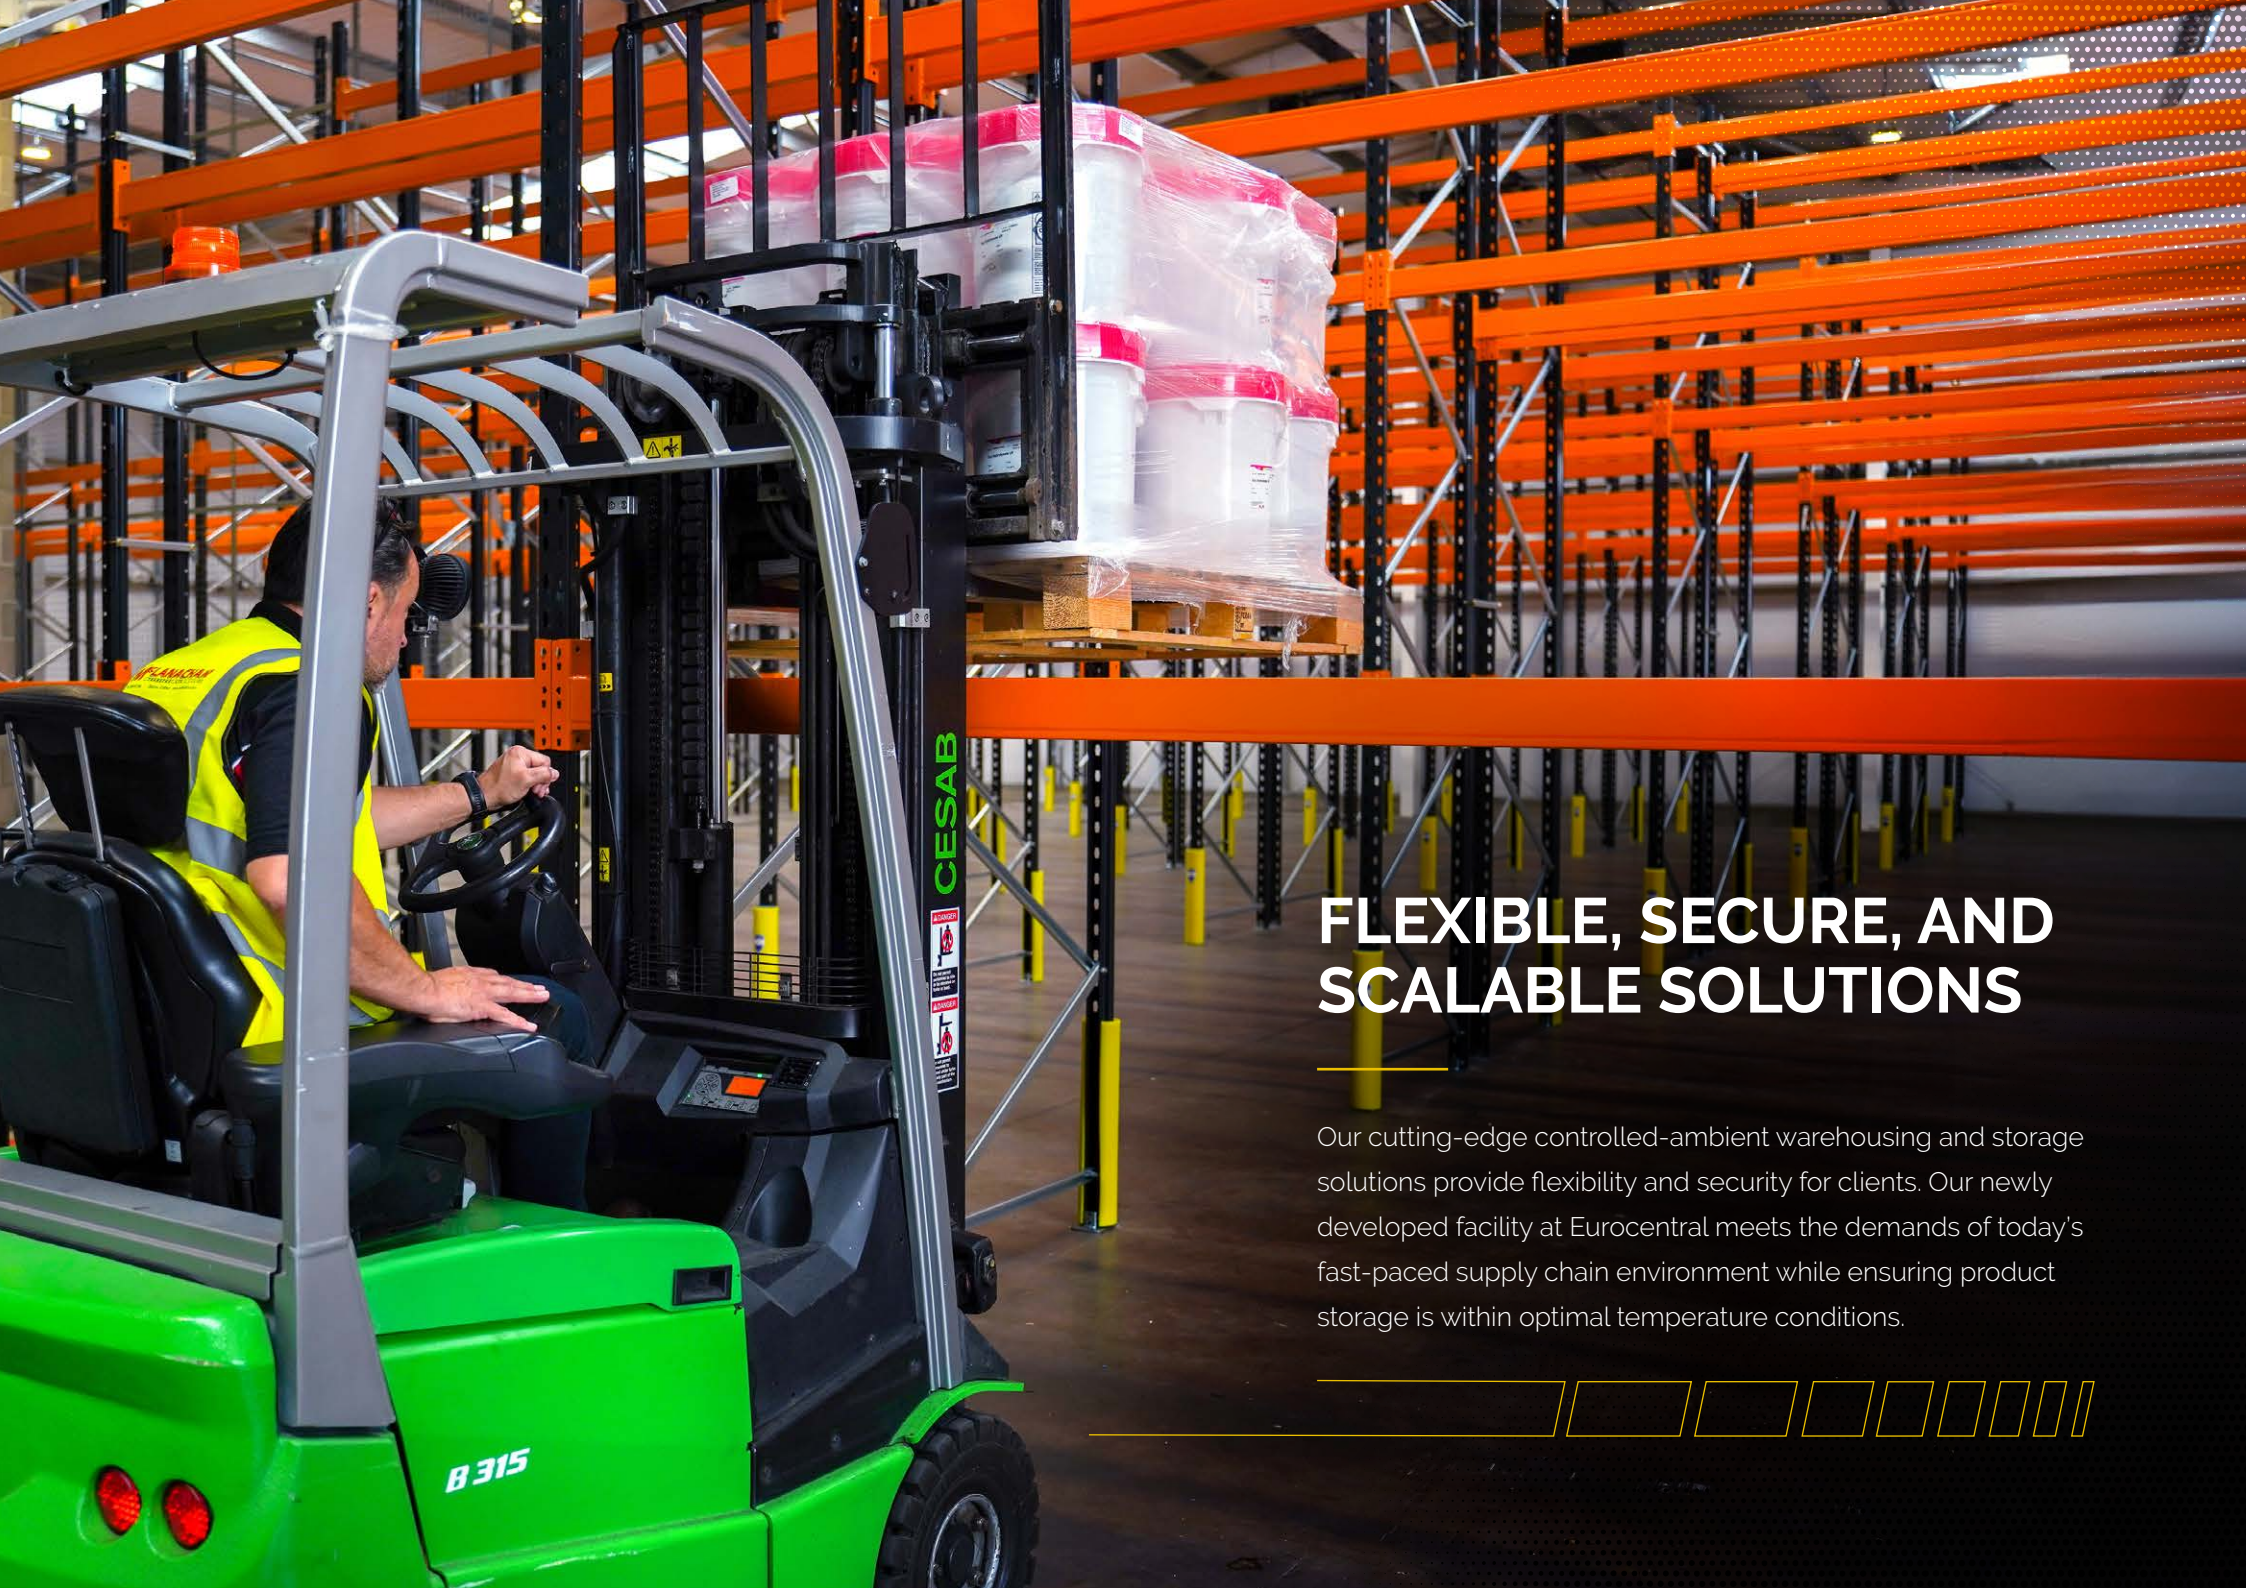

GDP Trained and Certified, you can be confident in our capabilities and accreditation. Whether it's pharmaceuticals, hazardous materials, or high-value goods, our team's dedication to understanding your requirements and delivering tailored solutions, prioritising integrity, efficiency and security, is at every stage of the journey.

We pride ourselves on our commitment to sustainability, reflected in every aspect of our business. Through our Environmental, Social, and Governance (ESG) principles, we have pioneered significant advancements in reducing our carbon footprint, including our investment in our operational hub, eco-friendly trailers and energy-efficient practices.

**Our success comes from the effective client relationships and robust logistics management we provide.**

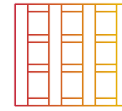

## FLEXIBLE, SECURE, AND SCALABLE SOLUTIONS

---

Our cutting-edge controlled-ambient warehousing and storage solutions provide flexibility and security for clients. Our newly developed facility at Eurocentral meets the demands of today's fast-paced supply chain environment while ensuring product storage is within optimal temperature conditions.

Up to 1,000  
Pallets

24/7 Site  
Management

Robust Security  
Systems

Temperature  
Control

## Key Features of Our Controlled-Ambient Facility

Our warehouse, with up to 1,000 pallets capacity, offers 24/7 site management, robust security systems, and precise, monitored temperature control, maintaining a range of 15 to 25 degrees Celsius, ensuring the integrity of your goods. The facility has state-of-the-art monitoring systems to track the temperature and environmental

conditions in real-time, providing complete visibility over your inventory.

MTL's warehouse management system delivers seamless integration of storage and distribution. Our reputation and reporting also mean a transparent approach to information on your products stored with us.

# Advantages for Clients: Scalability and Security

**Our controlled-ambient facility is designed with flexibility, making it scalable to accommodate businesses of various sizes and requirements.**

Whether you need long-term storage or short-term solutions during peak demand, MTL's facility provides the capacity and reliability to support your operations. Our secure site, equipped with advanced surveillance and security protocols, also ensures that

your goods are within a safe environment. We recognise that no two businesses are alike, so our warehousing solutions are fully customisable. MTL works closely with each client to understand their unique needs and product and goods movement, providing

tailored storage plans that fit seamlessly into your supply chain. Whether you are storing pharmaceuticals, healthcare products, retail stock, or sensitive materials, our facility provides the security and scalability you need to integrate with your supply chain.

## Seamless Integration with Transport Solutions

**MTL's warehouse facility is more than just a storage space - it is an integral part of our end-to-end logistics offering.**

We provide direct integration into our comprehensive transportation network from our warehouse, ensuring we manage your goods with the utmost care throughout the supply chain. Our fleet, equipped with temperature-controlled and ambient vehicles, allows for seamless transfer from storage to delivery, reducing handling risks and ensuring timely delivery.

This integrated approach means your inventory can move smoothly from our warehouse to its final destination, whether within the UK or Europe. MTL's in-house customs management further simplifies the process, enabling compliant, seamless cross-border shipments.
